Is the proposed development reasonably necessary for the purposes of agriculture?

- ☒ Yes
☐ No

If yes, please explain why

There is currently not enough room in the existing buildings in which to store all the fodder and bedding produced off the land owned. The applicant currently wraps the hay and haylage in plastic wrap and is stored on the fields from which it was produced. It then has to be transported to where it is needed, either the main farm stead or the neighbouring farm to the rented building for the mature livestock. The applicant would like to become a more environmentally friendly holding and by storing the fodder onsite it would reduce the use of plastic wrap and also the carbon foot print of the holding as it would significantly reduce the amount of travelling to collect and circulate the fodder.

Is the proposed development designed for the purposes of agriculture?

- ☒ Yes
☐ No

This building has been designed as an open plan building with the south side elevation and west gable open for ventilation and easy access by the holdings machinery and implements.
