Dear Sir / Madam,

After looking at the plans the proposed development at 4a well street doesn't show the waste pipe for my toilet or the fan in my en-suite and so if it was to go ahead it would block both of those things off and make my en-suite unusable.

There will be no way to get up to maintain or unblock my guttering and it would be extremely difficult to carry out any maintenance on my roof.

When I purchased my house it was sold to me as a semi - detached house , and this would now make it a terraced property so therefore devaluing the property.

Kind regards
Megan Smith
