Dear Planning Support

With reference to the above planning application, I would like to register an objection in regard to the above application for E uses for the following reasons.

When the premises were used for industrial purposes by the prior owner, Hall Engineering, the constant noise was intolerable and you will see from your records that I objected to both the level of the noise and the fact that it continued outside of reasonable hours for the business and often at the weekends.

The noise was such that residents of Geoffrey Avenue whose properties back onto the works, were unable to use their gardens for relaxation because of the noise levels.

There have been other businesses using the site previously which were busy but the noise was well within tolerable limits. I understand that originally the site had industrial use when it was used by the railway but since then, the area has developed into a residential one and is not at all suitable for heavy industrial enterprises.

I would be grateful if you would send me a direct link to this planning application. I have gone to Staffs Moorlands website and to search planning applications. I put in the application number, address etc and tried several searches but this application does not come up and I would like to view it, if you would send me the direct link please. I am surprised nothing comes up under the application number.

Thank you.

Yours sincerely

Jill Gordon
