Subject: Re: SMD/2021/0610

Good afternoon

I understand the developers have offered to put in a roundabout. However, this will not alter the infrastructure of Cheadle. There is no benefit to this development in Cheadle other than to bring even more chaos. There will still be plenty of time for cars to gather speed and lives will be lost.

My comments still stand from my previous email. Once this green open space is gone it can't be given back. Wildlife habitat will be lost forever.

This development will devalue my property. Is the developer going to pay compensation to the householders?

My privacy will be lost as well as sunlight from this unnecessary development.

Kind regards

Dear Sir

I would further like to add the following comments.

This land is green belt, which is very precious and once it is gone it is gone. We are already losing considerable amounts of green belt with the development on Donkey Lane and Brookhouses. New houses have already been built on the Ashbourne and Oakamoore Roads. No consideration or very little to the infrastructure of Cheadle has been given.

As stated previously, my property will be liable to flooding. Who is going to pay the insurance. The builder/council? Will I even be able to get insurance? If it is available will I be able to afford it?

The value of the property will also decrease. Is the builder paying compensation for this?

The social housing will have an impact on property prices in general for all of the houses backing onto the development.

Lives will be lost due to the poor access for this proposed development - can the Council live with this knowledge!

Very concerned resident.
