Submission: Objection

Comments: The size and scale of the intended proposal is not in keeping with the local area and will create an even greater traffic problem than already exists. There will be a huge pressure put on the already overstretched infrastructure which will only create more pollution. The likely affects of noise and associated extra traffic movements will only have an adverse effect on local residents and the surrounding area. Also this will cause more devastation in a predominantly rural area. The affects on carbon emissions and nature in general will be unacceptable.
