Submission: Neither

Comments: We have lived and farmed in this lovely area for approximately 60 years with our son and grandsons hoping to continue our work we have always respected the welfare of the countryside and the environment.

We have solar panels located on our land to provide green energy and have no objection to progress if it benefits the community and causes no disruption harm to the environment. However this proposal is simply a step too far, causing noise, pollution and spoiling what we have strived to preserve, and we strongly object to it .

Yours sincerely
