Submission: Objection

Comments: I have submitted comments already on the transport issues for our area that will be added to with the proposed Hills helicopter facility. A large proportion of the proposed development would be taking existing farming land out of the reducing stock of land that will grow food. At the recent Draycott Parish Council meeting attended by a representative of the Hills company it was pointed out that there were many brown-field sites that can be used, instead of green-field sites. For a small village on the edge of countryside, we are being presented with, a large extension to a business park, primarily for The Greenhouse People factory, a large addition to the housing stock, outnumbering the existing housing and now the proposal of a large facility for the construction and flying of helicopters. Does the fact that we are on the edge of the Staffs Moorlands Council, a long way from Leek have any bearing on the planning issues that we are experiencing?
