Submission: Objection

Comments: I would like to register my objection to the proposed planning.

This falls in green belt land and as such this should be preserved. The factory already emits significant odours that at times impact on the local residents, this planning highlights the potential for this to increase. The structure will be 300 metres from existing properties, this will add to the light pollution that we experience at night as well as to the drone from heavy plant equipment, reversing alarms on lorries etc. Our local road system struggles with the current lorries, traffic can back up over felthouse lane at peak periods when lorries are attempting to turn into Bones lane. This makes it unsafe especially when our children are trying to cross the main road to catch school and service buses. The road is showing signs of wear and tear with pot holes appearing close to the junctions due to lorries turning.

Will the factory extension impact on our water supply/pressure, we already see dips in pressure at times.

This extension will only add additional noise and inconvenience to local residents, road users and destroy yet more greenbelt land. The last biodiversity reed bed construction caused displacement of Rats to the local estate as well as the most horrendous smell when the bacteria were introduced.
