Submission: Objection

Comments: In addition to my objection. I feel that this planning application is very vague. Not only are Hills planning to build helicopters they are planning on test flying them 10 hours per day 10,000/20,000 flights per year ..yet this reads as though it is just a manufacturing building I find this application very misleading. Also the address of Hills says Rugby yet it is actually Rugeley? I believe the case officer Ben Hayward is in charge of this application therefore I presume he is in charge of this portal. Can you please correct the details?

I;d also like to add that I live directly on the flight path and in view of this proposed site area and not only have we not officially had any notification through the post or otherwise. Yet the application proposes to put several tall trees less than 3metres from my boundary affectively blocking the majority of light to my kitchen and bedroom. This surely goes against the right to light law.

This application should never have been considered In my opinion. I wish Jason Hill the best of luck in reaching his dream but Cresswell Staffordshire is NOT the area for him or any other helicopters to be built and tested. It is a lovely rural hamlet. Hill needs to find an airfield for his project .. somewhere away from residential houses.

Besides which stoke on trent is one of the UK;s poorer areas .. there;s is very few people in SOT that will be able to afford a private helicopter.. places like Surrey and Sussex are the richer areas.
