Comments: Further to my previous comments there remains on Blythe Business Pk. a toxic waste site. It makes me wonder why anyone would put health and possibly life at risk, should the worst case scenario occur, and one presumes the prospective builders know of this. One presumes that prospective buyers would be appraised of the toxic waste site near their homes. Now highly volatile aviation fuel could come into the mix, The two of these together - disaster should it possibly happen. Assurances of safety will, of course, be given, but accidents can and will occur. This applies to SMDC/2022/0267 and 0268 applications. C Elks
