Unmapped sewers

Thank you for your consultation.

Having reviewed our statutory sewer records, they do not currently demonstrate any public sewers on the property. However, due to a change in Legislation that came into force October 2011, there could be unmapped assets on the property that will enjoy the same protection as all our mapped assets.

Protective strips:

100mm to 225mm diameter sewers – 3m either side of the pipe, thus providing 6m protection zone across the diameter of the pipe.

300mm to 999mm diameter sewers – 5m either side of the pipe and providing 10m protective strip, across the diameter of the pipe.

Any sewers greater than 999mm diameter, enjoy a protective strip of 7.5m either side of the pipe (15m across the diameter).

Further information about the transfer, along with guidance to determine whether they're served by a public sewer can be found on our website: https://www.stwater.co.uk/my-supply/waste-water/looking-after-your-sewers/sewer-pipe-responsibility/

If your client believes they're served by an unmapped public sewer, please advise them to contact us for further guidance on this matter.

Regards

Dee Scott
