Subject: AP Proteins, Bones Lane Planning application SMD/2022/0088

Hello Mrs Curley,

I am emailing to add further comments concerning the above proposed application.

I see this application is not on the Agenda for the Planning Meeting on the 8th September 2022?

Last week the smells from the factory were really horrendous, in fact the worst they have been for many months. Tuesday 30th August was really bad, in fact I had builders working outside and they commented how bad the smell was and asked how I put up with it! On Thursday the smell was even worse. I spoke to the Environment Officer on site for AP Proteins. She visited me and asked if the smell was in the air, as she had trouble identifying it as she's working in that environment all the time. It was a cooking smell.... as in cooking dog food. It was abnoxious. We discussed the matter but nothing changed, in-fact that night it entered the bedroom through closed windows. We had a NE wind which always effects my property. A few weeks ago on a lovely day, a neighbour was entertaining and the they had to take their food indoors as the smell was dreadful. She spoke to Barney Williams who said they had lorries full of dead chickens on the yard awaiting process. It is so embarrassing when this happens. An afternoon spoilt because the factory can't manage its emissions.

I ring the National Environment Office also to complain, but nothing changes. My bedroom is on the front of my house and I can hear the whirling of the machinery during the night. If this application goes through the factory will double in size, more pollution and noise. The residents of Woodland Avenue will be greatly affected, trees have been uprooted which did screen the night floodlights and absorb the noise to some extent.

Many residents are complacent about the smells and noise, because nothing ever changes and now it looks like it will get even worse.

AP Proteins aren't concerned about offending a few hundred residents, but to us it is something we live with every day, because as the wind changes another area will get the smell.

I'm disappointed that the Cheddleton Parish Council didn't object to this application, but there again, the majority live elsewhere.

I sincerely hope that the concerns of residents will be taken into account.

Kind regards
Doreen Tildesley.
