

2) Froghall Road Development – Ness Grove (North East)

Residents off Ness Grove have raised concerns about the over-bearing aspect of properties on the new development.

The Image below shows how high the field has been raised in relation to the metal fencing top, just visible) and how much further the ground is to be raised to cover the footings in White.

The image below shows a substantial retaining wall has been built approaching 2 Metres high

The image below was taken at head height showing the significant elevation now the footings have been covered.

Below left shows how the new development towers over a 6 Foot Fence and would require an addition 6 Foot fence to replace lost privacy on what used to be an open field view. The right image shows the retaining wall further along
