Submission: Objection

Comments: I object to this application because of the threat to the environment and to human safety.

There are numerous potential hazards but I will focus on a small number in this representation.

1. The threat of pollution to the River Churnet which is situated below the steep sloping site. Please note that the Churnet can now boast returning salmon as one element of its wildlife.
2. The risk of placing buildings on sand. Indeed sloping sand!
3. The risk to residents of pools of water on site. One of these is 33 METRES deep. The other is 23 METRES deep. For those who prefer to work in old measure 33 metres is in excess of 100 feet. Rescue from this depth of water is at best extremely challenging and at worst out of the question.
4. The risk of a collapsing hillside depositing lodges in these deep waters.
5. The risk of a public inquiry into a potentially tragic event and the consequent negative effects on well intentioned public servants.

Thank you for reading my concerns.

Regards

Peter Cowie
