Comments: I would like to raise my concerns regarding the potential litter issue from this drive through 'restaurant'. We already have McDonalds litter in Leek, before this site opens and I am worried about the potential for more litter especially in areas like Brough Park, the Mount, nature park nearby and Rudyard. The litter picks organised by McDonalds will not cover these areas. Is it possible to insist that all take away materials are at least biodegradable?

In terms of the building, can the SMDC insist on the use of energy generation via solar panels and collection of rainwater for any local watering of the various planters etc - make it as energy efficient as possible to act as an example of what can be done? I am concerned about cars idling while waiting for food from the drive through windows - can it be made so it does not have the drive through option?
