Application no: HNT/2022/0032

Determined on: 12/10/2022

**Town and Country Planning Act 1990
Town and Country Planning (General Permitted Development) (England) Order 2015
Schedule 2, Part 1, Class A**

Householder Permitted Development Notification

APPROVAL

As there have been no neighbour objections leading to the requirement for a determination by the Local Planning Authority, this development can proceed as being permitted under Class A of the Town and Country Planning (General Permitted Development) (England) Order 2015 for:

Proposed single-storey rear kitchen/dining room extension at 4 New Road Werrington

The development shall be carried out in accordance with the details provided in the application.

The materials used in any exterior work (other than materials used in the construction of a conservatory) shall be of a similar appearance to those used in the construction of the exterior of the existing house.

X 

Signed by: Ben Haywood

On behalf of Staffordshire Moorlands District Council

Informatives

- 1 The proposed development lies within an area that may contain potential hazards arising from former coal mining activity. These hazards can include: mine entries (shafts and adits); shallow coal workings; geological features (fissures and break lines); mine gas and previous surface mining sites. Although such hazards are seldom readily visible, they can often be present and problems can occur in the future, particularly as a result of development taking place. It is recommended that information outlining how the former mining activities affect the proposed development, along with any mitigation measures required (for example the need for gas protection measures within the foundations), be submitted alongside any subsequent application for Building Regulations approval (if relevant). Any form of development over or within the influencing distance of a mine entry can be dangerous and raises significant safety and engineering risks and exposes all parties to potential financial liabilities. As a general precautionary principle, the Coal Authority considers that the building over or within the influencing distance of a mine entry should wherever possible be avoided. In exceptional circumstance where this is unavoidable, expert advice must be sought to ensure that a suitable engineering design is developed and agreed with regulatory bodies which takes into account of all the relevant safety and environmental risk factors, including gas and mine water.
- 2 Your attention is drawn to the Coal Authority Policy in relation to new development and mine entries available at:
www.gov.uk/government/publications/buildingonorwithintheinfluencing-distanceofmineentries
Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires a Coal Authority Permit. Such activities could include site investigation boreholes, digging of foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Failure to obtain a Coal Authority Permit for such activities is trespass, with the potential for court action.
3. Property specific summary information on past, current and future coal mining activity can be obtained from: www.groundstability.com or a similar service provider. If any of the coal mining features are unexpectedly encountered during development, this should be reported immediately to the Coal Authority on 0345 762 6848. Further information is available on the Coal Authority website at: www.gov.uk/government/organisations/thecoal-authority

Important Information

You may need other approvals, consents or licences for the development e.g. Building Regulations Approval.

The decision that prior approval is required and is approved was made on the information submitted. It should be noted however that:

- a) A variation from the submitted details following commencement of the development is likely to constitute unauthorised development and may be liable to enforcement action.
- a) Variation to the submitted details will require the submission of a new application.
