Submission: Objection

Comments: I have just opened up a revised plan of the above planning Application and I am afraid that this does not go far enough to gaining my support. I feel that the residents rights are still not being listened to.

I am of the generation that agrees renewable energy and new ways of improving the environment need to be considered BUT I also feel that residents rights to enjoy their own homes and living environment should ABSOLUTELY be considered!

Also with regards to the questions raised about NOISE assessment. The comments from the agent CANNOT be used as a robust assessment as it does not model the actual site, consider background noise (it just assumes that it is noisy from the A50) it does not take into account the CUMULATIVE noise with road traffic and other components on the site and more importantly fails to make any mention of the inverters only the transformers. They have strinf inverters which sit beneath each panel across the entire site therefore these need to be modelled to understand the potential impacts. Without this information they cannot conclude compliance and this is not in accordance with BS4142 which all noise assessments must be or demonstrate impacts on human health 'WHO GUIDANCE'!
