Submission: Objection

Comments: This must not go ahead for same reasons stated in previous applications 2022 0444,

2022 0548, 2021 0853.

If these go ahead, then what is the point of having a planning department because if these get passed then everything else should.

It would be a complete and utter eyesore on the landscape. The power station has been there for many years and there for a reason. These on the other hand are a way of making people a lot of money who obviously don't care about the area they live in. We have been approached by these companies and have turned them down because we'd rather look after the area than have battery storage on our land.
