Submission: Objection

Comments: This submission is along the same lines of the previously rejected proposed development regarding the Premier Garage site for a similar type of business to be situated on the same busy road.

The current traffic levels on this road already cause congestion on a daily basis

I already live on a street that has a persistant parking issue, with non-residents using it as a side street for "free parking" for town use.

This type of developement will lead to increased footfall of customers in general, incerase in noise and the amount of litter in the area.

Given the type of use these buildings would have, the submission itself has tried to shroud itself for its actual purpose to what the end use would be. This should not be how a planning submission should be executed.
