1 The Crescent ST13 8RW

We have been appointed by our client Ellipta claims management to deal with repairs at the afore mentioned property following impact damage from a vehicle

The property is in a conservation area and our repairs involve rebuilding the left hand side of the garage and repairs to the facade and door, the homeowner would like the repairs to be carried out in with keeping to the boundry wall, also they would like the garage shortened in length by approx. 2 feet which would involve cutting back the roof and a small section of the right hand side of the garage, the garage in essence would look almost identical to how it looks now with the exception of the left hand side which would have to be built in block/stone rather than the existing panels that are now obsolete
