Categories:

Good Afternoon Jane,

Thank you for consulting us on the revisions to the drainage strategy.

Note this doesn't resolve any outstanding issues listed in our response at Rev 10 of SMD/2021/0550.

We note that this new revision shows a different overflow interception ditch. We would need to see how this new design relates to the original hydraulic modelling and see revised model runs demonstrating the performance of a revised ditch before we could confirm its acceptability.

On the surface there doesn't appear to be any other major changes from Rev G previously submitted, we would however need to see revised calculations to confirm this.

Should you require any further information from us at this stage, please contact us on

Kind Regards
Roberta

Please note my working days are Monday to Wednesday.

Hi

Please can you pass to the Case Officer with this note

We have received this showing where the attenuation tanks are now proposed and I would be interested in your view on that

Many thanks

Jane

Dear Jane

Please find attached a new drainage strategy plan from our client's drainage consultant.

We are sending you this for information purposes only since drainage details will be approved under the drainage conditions attached to the outline permission, rather than by the RM approval itself.

The plan does not affect the proposed layout; it shows the position of the drainage tanks should there be any queries from members on this matter.

If you have any queries please let us know.

Regards
