The submitted Arboricultural Method Statement (AMS) ref. 10893_AMS.001 dated October 2022 by Aspect Arboriculture is a comprehensive document which sets out tree protection measures and procedures with regard to the approved residential development of the site, including provision for on-going arboricultural supervision during the course of construction.

This AMS satisfies the submission requirements of Condition 15 of planning permission ref. SMD/2021/0694, which may therefore be discharged. Condition 15 already includes a requirement for the development to be subsequently carried out only in full accordance with the AMS once approved, so no further obligations need be imposed in this regard.
