Description

Please describe details of the proposed development or works including any change of use

The installation of a fully carpeted non-turf cricket practice facility. This will replace our existing 23 x 2.5m (including concrete pads, steelwork, and netting) double lane practice area. These existing components will be excavated and removed from the area prior to building the new facility. The new facility will be of 3 lanes (2 lanes of 33m x 3.65m and the third lane of 27m x 3.65m) replacing the existing 2 lane one and will be located in the same area of the ground but on a different orientation. Based on guidance from Sport England and the England and Wales Cricket Board the orientation of the new nets will be different than that of the existing ones so that it complies with the limits of the stated Performance Quality Standards of a maximum angle of 55 degrees from a true North/South. This is related to health & safety concerns relating to the setting sun when the facility is used in the evenings. There will be no change of use.

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
