

In addition to our previous Objections of this planning application I have attached some pictures highlighting additional problems with the access road of Bridge End.

When the local football team are playing or if there is an event at the Leek Hockey Club we have numerous parked cars which line both Macclesfield road and also at the bottom of Bridge End. As you can see from the pictures below, at times we can barely get our cars through and there have been occasions where residents with bigger cars have been unable to pass their cars through at all. Meaning they sometimes have to park at Sainsburys and walk back home.

For this reason and the many reasons myself and the other Bridge End residents have given/demonstrated in our previous objections, Bridge End is absolutely unsuitable as an access road for even more cars to this proposed development.
