Comments: I was only aware the deadline this evening for this alternative council , will comment more fully on ESCC website : however seems your deadline is tonight . I object to this proposal as I feel the value of this agricultural land has been underestimated to be low quality grazing only whereas infact it is able to crop both grass as conserved forage and capable of cereal production (done nearby) I am also concerned how the installation would be carried out and maintained: all access roads to this location are narrow single track in most places with few passing places and are used by walkers / children /cyclists and horse riders :these roads are not suitable for HGVs and could cause serious accidents to other road users with the increased traffic /type vehicle . I fail to understand why a picturesque green productive large swathe of land near water sources risking contamination, should be proposed when there are many other large swathes of land in derelict condition in the county and around stoke on trent that could be repurposed for solar energy production. Nobody is doubting the need for green sustainable energy , but to loose such a large swathe of beautiful productive agricultural land will have massive impact on the local community and generations to come . It will also severely impact the many and diverse wildlife populations.
