Reference Planning Application: SMD/2022/034

We are writing to you following the proposed installation of a fully carpeted non-turf cricket practice facility at Cheadle Cricket Club.

Understanding that this proposal is in the proximity of the existing Practice Nets, has no consideration been given to moving the new location away from what is a residential area. There are areas around the ground that we believe this application would have little if any impact on.

We have had reason to bring to the attention of Cheadle Cricket Club the bad language and behaviour that we have to contend with. To the credit of the Club they have tried to police this, which has improved the situation. However, we are still subjected to language that we are embarrassed by when we have friends and family around. Looking at the application it increases the practice wickets from two to three. This increase obviously has the potential to increase the noise and abusive language. We have been subject to litter and waste food being deposited in our garden. Something again that can only increase with the proposed extension to the training area.

While we are concerned about the above please note that we do support Cheadle Cricket Club and enjoy the opportunity to watch and support the team.

Mr & Mrs Griffiths

Hillview 6, Barley Croft
Cheadle
