Email:

Submission: Neither

Comments: Issues with application.

1 The transport model proposed is unworkable due to the very narrow twisting road on Leigh Lane. Even now without the additional heavy traffic two passing cars is an issue

2. The entrance to the site should be changed. A concrete road to the applicants farm is already in place, and should be used to access the site

3 Solar panels on field 16 and 20 along Leigh Lane have a high visual impact. If these fields were left off the plan, or planted with trees, would not only resolve this issue but add more ecological advantaged.

4 The Tranformer and Battery Storage is immediately adjacent to the river Blythe (which feed Blithfield Reservoir). Any issue incurred with the batteries would cause highly toxic runoff into the river. At the consultation meeting with Lightrock Power in Leigh on 21st March, Lightrock suggested they would be prepared to modify the application to overcome some of these issues. In light of this should the decision be differed until the alterations to the appeal have been submitted
