

	If you have a heat pump that is capable of cooling as well as heating, the capacity entered must be the capacity based on the design heat load only. If your installation is a CHP system, this should be the installation capacity of all plants installed on the system	
HA130	Please re-enter the installation capacity in kWth	330
HA150	Please enter the name plate efficiency (or the system efficiency) of your installation as a percentage (%). For CHP installations please state the total system efficiency (%). If your installation is a heat pump, please enter the coefficient of performance	86
HA160	From 5 October 2015 all fuel used must meet the sustainability requirements. From this date, participants must provide information about the sustainability of the fuels used in each quarter (even if the fuel was purchased/received prior to 5 October). Please state which route of compliance you intend to use to demonstrate you meet the sustainability criteria.	Using fuels listed on the Biomass Supplier List (BSL) or Sustainable Fuel Register (SFR)
HA160-1	Please enter the authorisation number(s) of the fuel(s) you are using	BSL0042242-0002
HC100	Was the installation (including all plants comprising the installation) new at the time of completion and first commissioning?	Yes
HC110	Please enter the date on which the installation was first commissioned or the date the	12/09/2016
