Subject: Moneystone Park

Dear Mrs Curley

I am moved to write to you concerning development at Moneystone Quarry (SMD/2019/0646 and SMD/2019/0716) as a result of recent news regarding discharge of untreated sewage to rivers.

190 lodges with an occupancy ranging from 2 to 12 gives a mean occupancy of 7. A ball park figure for total occupancy is therefore 1330 plus staff. Will the stated strategy for dealing with sewage and grey water cope adequately with absolute certainty with the demands of a site of this scale which will potentially increase in size to a considerable degree. As an extra threat heavy rainfall arising from climate change makes flooding a frequent event throughout the country. Plans for the disposal of surface water onto the ground making use of gravity on a hillside add to the risk and we are now informed that during periods of heavy rainfall water companies discharge untreated sewage to rivers. Will this abuse of the environment be a necessary measure for the sewage system at Moneystone Park?

I appreciate that my figures may not be spot on but with additional phases they will act as a credible guide.

I ask that you consider my concerns with a particular focus on the future of the River Churnet which as you will know is in extremely good heart and enjoying the benefit of returning salmon.

Please regard this correspondence as an objection to the above mentioned Planning Applications.

Thank you.

Yours sincerely

Peter Cowie
