Submission: Support

Comments: The Association for Industrial Archaeology notes that this application is for the conversion of the former textile mill to provide 34 residential apartments with internal and external alterations. The present condition means that a new use for this mill, which is one of several in this area of Leek, is essential. In the conversion the exteriors will retain their main features including the very prominent datestone, although inevitably there are some changes. Internally the open nature of the floors will be lost in the conversion but this should be considered acceptable given that it will enable the building's reuse. Therefore the Association supports this application.

Amber Patrick,

Planning Casework Officer,

Association for Industrial Archaeology
