Dear Mr.Stokes,
You will be aware that in recent days Staffordshire Moorlands has experienced several sudden very heavy

downpours of rain. Certainly outside my home at such times the volume of rain water has come close to entering my property and twice last year that occurred.

A visit I made yesterday to view the MQ site showed clear damaging affects of the recent very heavy rain falls locally.

The attached article published on the BBC News offers a scientific explanation for some the increasing dangers that now affects us all.

Link to attached article below.

<https://www.bbc.co.uk/news/science-environment-66387537>

You will see that the attached world map shows the UK is now in the moderate / strong area that is or will suffer from the rise in sea level temperature. What is increasingly shown is that the rise in sea temperature is not some remote event but one that has the potential to dramatically affect the lives of residents of Staffordshire Moorlands.

Your Authority has quite properly adopted a Core Strategic policy to fight global warming and Climate change. In pursuit of the enforcement of that policy I ask these representations are now added to the planning applications SMD/2016/0378, SMD/2019/0646, SMD/2019/0725 and SMD/2022/0014.

Yours sincerely,
Paul Housiaux,
Whiston Resident.
