Application no: SMD/2023/0133

Determined on: 20/10/2023

Town and Country Planning Act 1990
Town and Country Planning (Development Management Procedure) (England) Order 2015 (as Amended)

FULL PERMISSION FOR DEVELOPMENT

This permission does not carry any approval or consent which may be required under any enactment, bylaw, order or regulation (e.g. in relation to Building Regulations or the Diversion of Footpaths etc) other than Section 57 of the Town and Country Planning Act, 1990.

Location of Development:
Adderley Mill Adderley Cheadle Staffordshire ST10 2NJ

Description of Development:
New B1/B2 & B8 commercial unit to land south west of the existing main commercial building.

In pursuance of their power under the above mentioned Act, Staffordshire Moorlands District Council Planning Authority, **HEREBY GRANTS PLANNING PERMISSION** for the development described above subject to the following condition(s):

1. The development hereby permitted shall be begun before the expiration of three years from the date of this permission.
Reason:- To comply with the provisions of Section 51 of the Town and Country Planning, Planning and Compulsory Purchase Act, 2004.

2. The development hereby approved, including building materials, shall be carried out in accordance with drawings numbered 5995 001b, 002a and 004.
Reason:- For the avoidance of doubt.

3. Unless prior permission has been obtained in writing from the Local Planning Authority, all noisy construction activities shall be restricted to the following times of operations.

08:00 - 18:00 hours (Monday to Friday);
08:00 - 13:00 hours (Saturday)
No working is permitted on Sundays or Bank Holidays.

In this instance a noisy construction activity is defined as any activity (for instance, but not restricted to, building construction/demolition operations, refurbishing and landscaping) which generates noise that is audible at the site boundary.
Reason:- To avoid the risk of disturbance to neighbouring dwellings from noise during unsocial hours.

4. The development shall be carried out in accordance with the following measures:-
-Any waste material associated with the demolition or construction shall not be burnt on site but shall be kept securely for removal to prevent escape into the environment. All waste transfer records shall be retained for inspection by officers of the Local Planning Authority;
-No activity hereby permitted shall cause dust to be emitted beyond the site boundary so as to adversely adjacent residential properties and/or other sensitive uses and/or the local environment. In the event dust is caused to escape the site boundary the activity shall be stopped until sufficient dust suppression has been undertaken to prevent further escape. There shall always be the appropriate means and sufficient water resources on site for dust suppression. These shall be made available for inspection when required by officers of the Local Planning Authority.
Reason:-
To protect the amenities of the area during construction

5. The machinery, plant or equipment including air condition and ventilation systems (""machinery"") installed or operated in connection with the carrying out of this permission shall be so enclosed and/or attenuated that the noise generated by the operation of the machinery shall not increase the background noise levels during day time expressed as LA90 [1hour] (day time 07:00-23:00 hours) and/or (b) LA90 [15 mins] during night time (night time 23:00-07:00 hours) at any adjoining noise sensitive locations or premises in separate occupation above that prevailing when the machinery is not operating. Noise measurements for the purpose of this condition shall be pursuant to BS 4142 (2014 +A1:2019)(Method for Rating and assessing industrial and commercial sound)
Reason:-
To safeguard the amenity of local residents and that of the surrounding area from noise disturbance.

6. Prior to the commencement of development, a scheme containing full details of arrangements for internal air extraction, odour control, and discharge to atmosphere from business operations, including any external ducting and flues, shall be submitted to and approved in writing by the local planning authority. The works detailed in the approved scheme shall be installed in their entirety before the use hereby permitted is commenced. The equipment shall thereafter be maintained in accordance with the manufacturer's instructions and operated at all times when brewing is being carried out unless otherwise

agreed beforehand in writing with the local planning authority.
Reason:-
To protect the amenities of nearby residents and comply with policy.

7.The artificial lighting incorporated into this site in connection to this application shall not increase the pre-existing illuminance or glare at the adjoining light sensitive locations when the light (s) is (are) in operation. Details of all artificial lighting to be installed under this permission shall be submitted to and approved inwriting by the Local Planning Authority prior to installation.
Reason:-
To protect the local amenities of the local residents by reason of excess of illuminance

8. Unless prior permission has been obtained in writing from the Local Planning Authority the premises shall only be open between the hours 08.00 and 18.00 Mondays to Fridays and from 08.00 to 13.00 on Saturdays and at no times on Sundays, public and Bank Holidays.
Reason:-
To ensure that the reasonable residential amenities of nearby residential properties are adequately protected from noise pollution.

9. No vehicles may arrive, depart, be loaded or unloaded within the general site except between the hours of 08.00 and 18.00 Mondays to Fridays and 08.00 and 13.00 hours on Saturday. And at no time Sundays and Bank Holidays.
Reason:-
To ensure that the reasonable residential amenities of nearby residential properties are adequately protected from noise pollution.

10. No power tools or machinery which are audible at the site boundary/ies shall be used outside the fabric of the building. All doors and windows to the premises shall be kept closed at all times except for the explicit purpose of entry to or exit from the premises or for loading and unloading purposes.
Reason:-
To ensure that the reasonable residential amenities of nearby residential properties are adequately protected from noise pollution.

11. Any forklift trucks used on the application site shall be fitted with noise attenuated reversing alarms. All such alarms are to be kept in working condition and operable wherever a forklift truck is used on the site.
Reason:-
To ensure that the reasonable residential amenities of nearby residential properties are adequately protected from noise pollution.

12. The building shall be constructed so as to provide sound insulation against internally generated noise of not less than 35dB(A), with windows shut and other means of ventilation provided. The building shall not be brought into use or occupied until the required sound

attenuation works have been permanently carried out. Such works shall be maintained thereafter for the life of the approved development.
Reason:-
To protect the amenity of the locality, especially for people living and/or working nearby,

13. (a) No phase of the development hereby permitted shall take place, except for works of site clearance and demolition until a risk assessment has been undertaken to assess the nature and extent of any contamination on the site, in accordance with a scheme to be agreed in writing with the Local Planning Authority. Once completed, a written report of the findings and recommendations shall be submitted and approved in writing by the Local Planning Authority.
(b) If the site risk assessment (a) indicates that potential risks exist, development shall not commence, until a detailed remediation strategy to bring the site to a condition suitable for the intended use has been submitted to and approved in writing by the Local Planning Authority.
(c) Following completion of measures identified in the approved remediation scheme (b) and prior to bringing the development into first use, a verification report that demonstrates the effectiveness of the remediation carried out must be submitted to and approved in writing by the Local Planning Authority.
(d) If, during the course of development, any contamination is found which has not been identified in the site investigation, additional measures for the remediation of this source of contamination shall be submitted to and approved in writing by the local planning authority. The remediation of the site shall incorporate the approved additional measures.
The scheme must ensure that the site will not qualify as contaminated land under Part 2A of the Environmental Protection Act 1990 in relation to the intended use of the land after remediation.
Reason:-
To ensure that the proposed development meets the requirements of the National Planning Policy Framework in that all potential risks to human health, controlled waters and wider environment are known and where necessary dealt with via remediation and or management of those risks

14. The development hereby approved shall not commence until drainage plans for the disposal of surface water and foul sewage have been submitted to and approved in writing by the Local Planning Authority. The approved scheme shall be implemented in exact accordance with the approved details before the development is first brought into use.
Reason:-
To ensure that the development is provided with a satisfactory means of drainage as well as to reduce the risk of creating or exacerbating a flooding problem and to minimise the risk of pollution.

Informatives

1. This is considered to be a sustainable form of development and so complies with the provisions of the NPPF.

2. Please be aware that the responsibility for safe development and secure occupancy of the site rests with the developer:

•
Any approved noise scheme and measurements should pay due regard to the Professional Guidance on Planning and Noise (ProPG), British Standard BS8233: Sound insulation and noise reduction for buildings (Code of Practice), BS 4142 (2014 +A1:2019)(Method for Rating and assessing industrial and commercial sound) and/or the Building Regulations 2010 Document E or other appropriate guidance

•
Advice on controlling flies and light can be found in: Statutory Nuisance from Insects and Artificial Light (defra 2005) available as a free download http://archive.defra.gov.uk/environment/quality/local/legislation/cnea/documents/statn

Asbestos: A Demolition or refurbishment asbestos survey and risk assessment should be carried out prior to the demolition/renovation of the existing buildings. The enforcing authority for this type of work is the Health and Safety Executive (HSE) and it is recommended that you contact them directly to discuss their requirements: http://www.hse.gov.uk/

•
During any demolition and construction activities (including landscaping) the contractor shall take all reasonable steps to prevent dust formation and prevent any dust formed from leaving the site boundary.
Building Research Establishment Guidance Document 'Control of Dust from Construction and Demolition Activities' (BR456)

•
If required, contamination risk assessments shall be carried out in accordance with UK policy the Land contamination risk management framework (LCRM), published by the Environment Agency
https://www.gov.uk/government/publications/land-contamination-risk-management lcrm

•
Submission of reports should also be made to the Environment Agency for comment with regard to their remit to protect ground and surface waters from pollution and their obligations relating to contaminated land.

•
The Local Planning Authority will determine the acceptability of reports on the basis of the information made available to it. Please be aware that should a risk of harm from contamination remain post development, where the applicant had prior knowledge of the contamination, the applicant is likely to be liable under Part II (a) of the Environmental

Protection Act 1990 and as such become and “appropriate person”. In this event the applicant will be lawfully responsible to remove the risk posed by the contamination.

•

Equally if during any site works a pathway for any contaminant on site is created and humans, waters, property or ecological systems are exposed to this, the applicant or those acting on behalf of the applicant will be liable under part II (a) of the Environmental Protection Act 1990 if the risks are not adequately addressed during the site redevelopment.

•

During investigation and remediation works the applicant and those acting on behalf of the applicant must ensure that site workers, public property and the environment are protected against noise, dust, odour and fumes

•

The applicant is advised that should there be a requirement as part of the Remediation Strategy to treat, reuse or remove contaminated material on the site, the Environment Agency must be consulted, as these activities may need to be licensed or permitted. Contaminated materials identified for removal off site must be disposed of in an appropriately licensed landfill site.

•

Staffordshire Moorlands District Council is keen to liaise with all stakeholders involved in this application. As such, we recommend that a proposed scope of works is forwarded to the Environmental Health Department and agreed in principle prior to site investigation works being undertaken. The Environmental Health
Department is also prepared to
review draft copies of reports prior to final submission to the Planning Department in order to ensure that works undertaken are sufficient to discharge the contaminated land conditions.

X B.J. Haywood

NOTES

1. Approval under the Building Regulations may also be required. Advice in this respect can be obtained by contacting DBCP Limited, Web: dbcp.co.uk; Email: info@dbcp.co.uk ; Tel:0333 880 2000.

1. Where a vehicle is often driven across a grass verge or kerbed footway to and from premises adjoining a highway, the occupier of the premises may, be required to pay the cost of construction of a crossing, and/or may be required to comply with conditions, imposed by the Authority. You should contact the Highway Authority at Staffordshire County Council.

2. This consent is granted subject to conditions and it is the owner(s) and the person(s) responsible for the implementation of the development who will be fully responsible for their compliance throughout the development and beyond. An application will need to be made to discharge conditions and a fee is payable with the application. For more details please refer to our web site: www.staffsmoorlands.gov.uk If there is a condition that requires work to be carried out or details to be approved prior to the commencement of the development this is called a "condition precedent". The following should be noted with regards to conditions precedent:
   (a) If a condition precedent is not complied with, the whole of the development will be unauthorised and you may be liable to enforcement action.
   (b) Where a condition precedent is breached and the development is unauthorised, the only way to rectify the development is the submission of a new application.

3. Other conditions on this permission must also be complied with. Failure to comply with any condition may render the owner(s) and the person(s) responsible for the implementation of the development liable to enforcement action.

4. The permission is granted in strict accordance with the approved plans. It should be noted however that:
   (a) Any variation from the approved plans following commencement of the development irrespective of the degree of variation will constitute unauthorised development and may be liable to enforcement action.
   (b) Variation to the approved plans will require the submission of a new planning application.

5. If you are aggrieved by the decision of your local planning authority to refuse permission for the proposed development or to grant it subject to conditions, then you can appeal to the Secretary of State under section 78 of the Town and Country Planning Act 1990.

6. If the decision to refuse planning permission is for a householder application, and you want to appeal against your local planning authority's decision then you must do so within 12 weeks of the date of this notice.

7. If this is a decision to refuse planning permission for a minor commercial application, and you want to appeal against your local planning authority's decision then you must do so within 12 weeks of the date of this notice.

8. If this is a decision to refuse express consent for the display of an advertisement, if you want to appeal against your local planning authority's decision then you must do so within 8 weeks of the date of receipt of this notice.

9. If you want to appeal against your local planning authority's decision for any other type of development, including listed building consents then you must do so within 6 months of the date of this notice Appeals must be made using a form which you can get from the Secretary of State at Temple Quay House, 2 The Square, Temple Quay, Bristol BS1 6PN (Tel: 0303 444 5000) or online at https://acp.planninginspectorate.gov.uk

10. The Secretary of State can allow a longer period for giving notice of an appeal, but will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal. The Secretary of State need not consider an appeal if it seems to the Secretary of State that the local planning authority could not have granted planning permission for the proposed development or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order.

11. If either the local planning authority or the Secretary of State refuses permission to develop land or grants it subject to conditions, the owner may claim that he can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted. In these circumstances, the owner may serve a purchase notice on the Council (District Council, London Borough Council or Common Council of the City of London) in whose area the land is situated. This notice will require the Council to purchase his interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.

12. Domestic sprinklers
    Fire sprinklers operate automatically even if you are not at home releasing water directly over the source of the fire and sounding the alarm, they are unobtrusive and easy to install.
    Sprinklers are NOT expensive; normally costing around 1-2% of the cost of construction of a new building. The use of sprinklers will usually allow design freedoms as well, which can reduce construction costs and improve usability and design freedoms of the building.
    The chance of an accidental discharge is 16,000,000:1
    If you would like further advice please contact Staffordshire Fire and Rescue Service (www.staffordshirefire.gov.uk)

13. Working smoke alarms correctly positioned in your home can save your life.
    The Fire Service recommends you have smoke alarms on every floor of your home, including in each bedroom, and make sure you test your smoke alarms at least once a month.

Although the application of approved guidance and enforcement of regulations will give buildings the legally required baseline of fire protection, the Fire Service's viewpoint is many of these fall short of what we would consider adequate. This is why we campaign for the inclusion of sprinklers.
