Subject: Objection SMD/2023/0568

This photograph taken on the private access road leading to Rownall National Grid transformer Station, well south of the proposed Solar Farm site, looks north towards the rising land and summit of Rownall Ridge with the tree on the horizon marking the northern most boundary of the proposed Solar Farm!

This must be around 1/2 miles of the site illustrating the extent of visual landscape damage likely even from the south.

Please add to my already posted objections
