Submission: Objection

Comments: The proposed development is on a very dangerous road that is already subject to community speed watch taking place. It would be totally unsafe to have any more cars on an already dangerously busy main road. The drains on this road are flooding regularly and more houses would have a detrimental impact on this. The area in question is also home to wildlife including owls and bats and it is environmentally unsound to destroy the habitat of protected species and damage the environment as several old trees that acted as habitats will have to be felled if this development goes ahead.
