The Grange Clay Lake

We have lived on Clay Lake for 50 years and have always become involved in matters concerning the area and preserving its beauty and tranquility

We wish to raise the following objections to the above proposed development

- * Traffic surveys which we have undertaken identified a need due to increased volume for warning lights and crossing areas for pedestrians and school children The area around The Grange is particularly bad as there are 2 bends and you need to rely on sound to cross pavements at this point
- * Joining the narrow road can be particularly hazardous due to heavy traffic using the route
- * Schools and medical provision in the area are already running at maximum capacity and couldn't support a further housing estate
- * Drainage of water is already creating problems at the bottom of Clay Lake and in Stoney Lane
- * We express concern at the necessity to demolish The grange house
