Submission: Support

Comments: Much needed step in the right direction. Future-proofing our local area whilst enabling a cleaner source of sustainable energy. I strongly support this application because of the opportunities it will bring to the Moorlands and beyond.

The ground can still be grazed by sheep with the proposed fencing and the site is next to the substation, which would mean that delivering the project won't dig up miles of roads or countryside.

With the ever-rising costs of living, it is refreshing to see forward thinking projects like this one are being proposed. It's also fantastic for the local children to see this kind of change. They all talk about the global climate crisis at school, and this would reinforce the importance of change and our responsibility towards the planet.
