Comments: Dear Staffs Moorlands District Council

I would like to confirm my support for this excellent renewable energy project.

It is clearly a well designed scheme and in accordance with the UK Governments net zero strategy.

I think Staffordshire Moorland's District Council, and indeed the residents, should support such schemes to shape our sustainable energy needs and deliver the much needed infrastructure. By doing so, we will be driving down the cost of electricity in the UK, in what has been a very volatile world over the past few years, with no end in sight for an optimistic future on the cost of energy.

The scheme appears to be located in an ideal position to access the main Werrington/ Cellarhead substation, therefore the impact to the local countryside and roads will be limited.

Staffordshire needs to keep up with our neighbouring counties in delivering renewable energy projects.

SMDC have embraced numerous wind projects and battery storage schemes which must be applauded. I hope the same forward thinking approach will again be applied by the officers and the elected members of the planning committee for this project.
