Application Reference DOC/2024/0009

Rights of Way

Many thanks for sending us the document relating to these works. You recognise that there are a number of paths across the site (Footpath 15, 27 and 32 Draycott in the Moors and No 4 Checkley).

It is essential that the public rights of way are kept open both during and post-development of the solar farm. This is recognised within the documents and a minimum width of 1.8 metres is proposed for path users. We note that the definitive lines and the desired lines differ in some places but this is recognised by the developer and both will be kept open. It is important that surface vegetation is cleared because when paths are fenced in vegetation can become obstructive to path users.

The one point to note is that fencing is shown going across the definitive line of Footpath 32 Draycott in the Moors as it heads north from the woodland copse. Please can this be checked and rectified so that the legal path alignment is not obstructed.

Kind regards

Paul
