Submission: Objection

Comments: I believe this development to an appalling waste of good agricultural land. Having lived locally for over 50 years I have seen it grow cereals and grass supporting livestock farming. As a country we need to be as self sufficient as possible. Once the top soil is disturbed this land will take decades to recover if ever. Land is a finite resource. I believe believe wind power to be less disruptive to agricultural, more efficient in our climate and more acceptable to the local population.
