Hi Declan,
We've received the above application to comment on. I've had a look at the landscape strategy plan, and the rights of way aren't plotted correctly. I've overlain the plan onto our rights of way mapping system, and georeferenced them.
I've attached a screenshot to show what I mean. (Please don't upload this anywhere; it doesn't have the necessary copyright, it's purely informative to show the applicant).

The correct alignment of the rights of way may be seen on our online web map here: [Staffordshire County Council Public WebMap](#)

Alternatively, to ensure more accuracy, I can provide the applicant with digital data of the footpath/s, that is used to produce the definitive maps of public rights of way, if that would help. This would be for the lines only, not the background mapping and would be supplied as GIS or CAD files, in Ordnance Survey grid coordinates.

If the above is of use, can you please let me know which format of data they would like?

Kind Regards,

Julie

Julie Hall
