

Daisy Glamping Pod Waste Storage & Collection Plan

- Each of the 11 Glamping Pods have a 30l kitchen waste bin and a 5l bathroom pedal bin. The welcome book explains that each guest is to empty these into the 240l wheelie bins located at either of the 2 firepits on departure. We have 2 for general waste and one for glass recycling.
- The 240l general waste wheelie bins are emptied daily by the team using an electric golf buggy with open bed back. The refuse is then emptied into a 5 tonne skip in the compound. The compound is located across the access road to the Daisy Pods. The compound is locked when not in use and surrounded by fencing.
- The 240l glass recycling bin is collected fortnightly by Peak Waste.
- The skip is emptied fortnightly by Peak Waste.
- Please see link for Peak Waste policy: <https://www.peakwaste.co.uk/waste-to-energy>
