In relation to the new property, I have little concern or objection. However, i do object that residents are now not able to access the field and below footpath via the gate.

Residents have been able to access the field and below footpath which leads to the village and local school for many years. This access has been restricted since the erection of the new properties at the end of the road.

The public footpath at the bottom of the field is still accessible via an entry point mid way down Cheddleton Park Avenue. However, due to the added walk of 15+ mins each way, it reduces the amount of times I am able to walk to school with my young children. In turn adding to the already heavily congested car park of Cheddleton Village Hall and surrounding roads during morning and afternoon drop off and collection.

I would like it to be considered that access is made via the gate again to allow residents a quick route into the village, pubs and up to the local school.

Regards,
Alex Ruscoe
