Comments: Previous operation of a biomass boiler on the site created a considerable air pollution problem. At times, much smoke was generated which hung around the valley and made life for neighbours and their animals very unpleasant. What steps are being taken to ensure there is no smoke pollution from these four new boilers? Enjoying our garden is important to us and we often have our grandchildren playing there, almost adjacent to the proposed new boiler site. The previous boiler was further away at the other end of the existing building and that was problem enough.
