Submission: Objection

Comments: I strongly object to yet another BESS Application in this small rural area.

Has anyone actually looked at all this destruction to our area. A green space of abundant wildlife and natural habitat will become an industrial park! I dont think anyone within the local area came to live here to be in the middle of all this! The greatest concern is the close proximity to residential areas including schools, what will happen if these explode which is totally possible. The plans dont even meet current regulations. This is a quiet rural area and the noise from these will also be totally unacceptable. Toxic dust clouds from exploded batteries are highly dangerous to life and health. We do not want the worry of these in our area. We have enough with the intrusive pylons that dominate our landscape.
