Comments: We only received our information letter from the council 2 weeks ago informing us of these multiple applications for Solar farms and battery storage facilities. This is nothing more than large scale industrialisation of green belt land. What about wild life?

Emergency access to the battery facility is planned on the public pathway past my property and 4 other residential properties, who will monitor that this is used as emergency access only. If the battery facility catches fire who will guarantee our safety and exposure to toxic fumes??

Battery noise, surely we have a right to noise abatement especially in the summer when the cooling of such a facility will be at it's highest.

Increase in noise from all the vehicular access around the single track country roads. The HGV's already up and down Rownall Road are adding to the safety within this area as there are no pavements on an already unsafe road.

As for the solar farm, the increase in flooding within the proposed site and the surrounding land will surely only lead to further chaos on an already failing infrastructure.

I strongly Object to the proposed planning applications
