Submission: Objection

Comments: As a local resident, I often walk and enjoy the countryside that we are privileged to have on our doorstep. I have to object to this proposal for an energy facility that uses batteries. Reading the application it concerns me to see that:

- Greenbelt land would be sacrificed which is tragic.
- Open views and landscape would be tarnished.
- Public footpaths would be lost.
- Lack of an environmental report to consider, including risks.
- Lack of a fire service report to support or not support the application. Given the risk and toxic substances that could be exposed, this alone is a risk and major concern.
- Ambient/back ground noise is not really mentioned. All surveys discuss predicted levels of noise but no confirmation of what they actually would be.
- Impact to wildlife, local residents and businesses that will suffer.

Thanks
