Submission: Objection

Comments: I object to this planning application for the following reasons:

It is inappropriate development in the Green Belt; it is not a source of renewable energy.

There is a considerable fire and explosion risk associated with battery farms, the location of the proposed site has many residential dwellings and established businesses operating in the neighbouring vicinity; this risk is unacceptable to the local community.

The noise pollution generated from the sheer volume of batteries on this site is a major concern. The noise will travel far across the open Green Belt and a wide number of neighbouring properties.

Visual impact - the huge industrial complex will harm the openness and character of the rural area. It would be visible from local footpaths
