

Hi

I am writing concerning the application for the permanent plan of the storage containers for the above application number.

Please see previous emails regarding complaints from myself about these.

We have no issues for the land being used for the permanent use of storage containers. Apart from the 2 containers that are right up against our end fence panels. These 2 containers are very close to our fence/border. They are an eyesore from the garden and our house and cannot be missed. Please see photos. I feel these 2 containers impact my house far more than most of my neighbours. As previously stated we are more than happy for the use of the land but would really appreciate the 2 storage containers in the photo being moved.

Thanks,

Lucy Morgan
