

2m high Laurel hedge to be installed to perimeter

1FS Schwegler Large Colony Bat Box:

inside of the roof, with an insulated grille onto which the bats can easily grip or hang on to.

The Schwegler 1FS Large Colony Box provides bats with a very large internal space. This allows high numbers of bats to congregate together and makes it very popular for accomodating large colonies in summer. It is particularly attractive to Noctule (*Nyctalus noctula*), Nathusius' Pipistrelle (*Pipistrellus nathusii*) and Common Long-eared Bat (*Plecotus auritus*) and nurseries containing 70-100 bats have been observed. The large internal space and variety of hanging places makes it ideal for bats to use as a nursing area. The 1FS is suitable for both summer and winter.

The front panel consists of three grooved wooden panels and the special roof panel with an insulated grill is ideal for bats to cling to. A special panel is fitted on the

1SP Schwegler Sparrow Terrace:

Made of Schwegler's revolutionary wood-concrete mix, this terrace is durable, breathable and will last many decades. It may also occasionally attract tits, redstarts and spotted flycatchers.

The terrace can be fixed on to the surface of a suitable wall or incorporated into the wall. It is suitable for all types of houses in built-up areas, and on industrial and agricultural buildings such as barns, sheds and factories. Due to its weight (15kg), it is not suitable for fences or garden sheds. Ideally place the terrace two metres or more above the ground, using the plugs and screws provided. Alternatively, install directly into the wall. Cleaning is advisable but not necessary. The front panel can be removed by turning the screw hook.
