- ☐ Rule 6 (6)

What kind of representation are you making?

- ☐ Final Comments
- ☐ Proof of Evidence
- ☐ Statement
- ☐ Statement of Common Ground
- ☒ Interested Party/Person Correspondence
- ☐ Other

YOUR COMMENTS ON THE CASE

I object to This proposal will be absolutely devastating to our local area. The solar farm will not benefit our local community and the only benefit is making profit to already rich large corporate energy firms. This will have a negative impact on our local area, considering the volume of heavy goods traffic expected to be travelling through rural roads in close proximities to residents and local schools. The noise nuisance expected from these solar farms would not be good for the surrounding areas for residents, animals, local businesses.

Why ruin our lovely green/brownbelt land and the surrounding environment, solar panels are more suited for rooftops of industrial building in already noise polluted areas.

The risks of fire, explosion and toxic clouds to the local area needs to be considered, given the close proximity to residents and schools and businesses near by.

The proposed size of the site is disproportionate to the location. Just because we have the green belt /brownbelt land does not mean we should fill it all with solar farms.

Where will it end? Until we have no green belt/brownbelt land, lose our environment in which we have national heritage, farming and wildlife.
